**Pages designed:**

1. Home page
2. Login page

3. Signup page
4. Events page
5. Event-details page
6. User profile page
7. Anonymous Complaint Form
8. Lost & Found page
9. Lost form
10. Found form
11. Contact page

### **Design description:**

My design has been made in Figma, which resembles a responsive, user-friendly, mobile-first student community app titled 'IIITDM Student Community' with an eye-catching logo. The main motto of the app is Connect. Discover. Thrive. I chose light mode as standard as it is an educational app. I chose mobile app design as it would be comfortable for students rather than opening a website which is comfortable in laptop more than mobile. My primary colors are #B71C56, #5521DD and FFF9E1 and for buttons mostly i used an alpha variant of the primary color. In my figma design, i crafted a total of 11 pages including login and signup page with 5 wonderful features such as Events feed, Lost & found feed and their forms to post, Contacts Directory and Anonymous Complaint Form and a home page showing recent feeds and a tagline motto for students' motivation. Bottom navigation bar with clear icons and labels: Home, Events, Lost & Found, Report and Contacts. I spent a total of 12 hours on crafting each part of my app UI/UX design. More than 90% of the UI are dynamic and responsive which directs you to the right place and reach whichever page you would like to move.

My design stands out for its minimalistic, clean, accessibility-focused, mobile-first student community app which will really be useful to students if developed into app or website in the future.

We believe this design transforms small daily campus challenges into an effortlessly connected experience for every student.

Thank you:)
